# Windbreaker

Wind or no wind. Bad weather or good weather. Maintain a view as clear as glass. Experience the outdoors with our unique Windbreaker, featuring our vertical sliding technology.
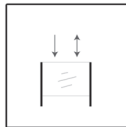

Perfect for terraces. Ideal for creating a partition. Thanks to our innovative Windbreaker, we make outdoor living even more attractive.

In addition, you can expand the Windbreaker with a base that can also function as a planter. The base eliminates the need for screws in the ground and creates an immediate green environment.

The base (with or without a planter) is optionally available with wheels, making the Windbreaker easily movable and versatile for use in any location.
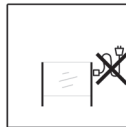

**DEPONTI.COM**

The base and wheels are supplied in black. These can be easily mounted under the Windbreaker. The planter is supplied in the same colour as the Windbreaker.
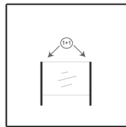

**Easy to use**
With a click, the vertical sliding system opens easily. A screen rises and extends with gentle speed. With the same simple movement you can click and lower the screen again.

**Without power**
Because operation is manual, no electricity is needed. Installation is easy, you just set it level and in the direction you want.

**Minimalist partition**
Thanks to its minimalist design you can enjoy a view as clear as glass. All profiles are slim in appearance and well concealed.
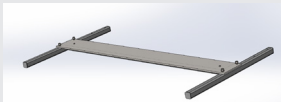

**Stable and sturdy unit**
Despite the slender appearance, the profiles carry considerable weight. The mounting feet are easy to secure to the surface. In addition, we use 8 millimetres toughened safety glass.

**PRODUCT INFORMATION**

| | |
|---|---|
| Retracted height | 1100mm |
| Extended height | 1900mm |
| Available widths | 1000mm / 1500mm / 2000mm |
